

# A NEW APPROACH TO TYPE 2 DIABETES

## Type 2 diabetes can be hard to manage despite best efforts

If you have type 2 diabetes, you could benefit from a clinical research study evaluating a non-drug procedure that may help improve blood sugar without increasing medicines or insulin.

### WHO CAN PARTICIPATE IN THE REVITALIZE 1 STUDY?

You or a loved one may be able to participate if you/they:

- are 21–70 years of age
- have been diagnosed with type 2 diabetes
- are taking insulin and other medications

*Revita® is for investigational use only in the US.*

To learn more, please contact:

A large white rectangular box that has been redacted, obscuring the contact information for the study.
